

Package: pinteresturl (via r-universe)

September 20, 2026

Type Package

Title Parse and Normalize Pinterest URLs

Version 0.1.2

Description Parses, classifies, and normalizes public Pinterest URLs without making network requests. Supports Pin, short, profile, board, and Ideas URLs across Pinterest country domains while rejecting lookalike hosts, credentials, non-HTTPS URLs, encoded paths, and non-standard ports.

Contents

is_pinterest_url	2
normalize_pinterest_url	2
parse_pinterest_url	3

Index	4
--------------	----------

is_pinterest_url	<i>Test whether a URL is supported</i>
------------------	--

Description

Checks a Pinterest URL without making a network request.

Usage

```
is_pinterest_url(url)
```

Arguments

url	A single character string.
-----	----------------------------

Value

TRUE for a supported URL, otherwise FALSE.

normalize_pinterest_url	<i>Normalize a Pinterest URL</i>
-------------------------	----------------------------------

Description

Normalizes a supported Pinterest URL without making a network request.

Usage

```
normalize_pinterest_url(url)
```

Arguments

url	A single character string.
-----	----------------------------

Value

A canonical URL string.

<code>parse_pinterest_url</code>	<i>Parse a Pinterest URL</i>
----------------------------------	------------------------------

Description

Parses one URL without following redirects or making any network request.

Usage

```
parse_pinterest_url(url)
```

Arguments

<code>url</code>	A single character string.
------------------	----------------------------

Value

A list with `kind`, `normalized_url`, and `identifier`.
